

Volunteers needed for a research study on vision in older adults

UGA researchers are recruiting adult volunteers between the ages of 60-70 for a study on how the brain responds to bright light and how light filtering impacts glare, comfort, and acuity.

Criteria: Between 60- 70 years old, generally good uncorrected vision (at least 20/70 uncorrected), no significant history of ocular disease, able to safely be scanned in an MRI scanner.

A stipend will be provided as well as a UGA souvenir!
