Participants needed for COVID-19 study

Researchers at UGA are conducting a study to learn more about COVID-19 infection in our community, including immune responses in those who have or have not had COVID-19. Prior COVID-19 infection not necessary.

You can receive $30 by participating in the study.

STUDY REQUIRES ONE VISIT

PARTICIPANTS WILL:

• Be asked questions about their health and personal information
• Undergo a blood draw and saliva collection
• Have height and weight measured

Please note we are not doing any COVID-19 diagnostic testing as part of this study.

ELIGIBILITY REQUIREMENTS:

• Be between the ages of 50-90 years old
• Weigh at least 110 lbs
• Have no autoimmune disease diagnoses
• Have no recent treatment with oral or injected steroid medication
• Live in the Athens area or surrounding communities
• Have not experienced cough, fever, or other symptoms of COVID-19 in the past 2 weeks
• PRIOR COVID-19 INFECTION IS NOT NECESSARY

The study team is adhering to the CDC’s recommended infection control procedures and social distancing practices (where possible) during this study. If you have questions or concerns about our safety protocol, please let us know.
